

This model of the device should not be used for 24VAC alternating voltage, for example from network transformers. Its use will damage the protection or transformer.

Specification:

Nominal voltage line-line	24VDC
Maximum voltage line-line	27VDC
Maximum voltage line-ground	90VDC
Protection level line-line (10/1000 μ S)	40A
Protection level line-ground (8/20 μ S)	2 x 10kA
Nominal current	1,1A @ 24VDC
Maximum current (pulse)	2A @24VDC
Tightness of the housing	IP54
Operation temperature	-30°C~60°C
Dimensions	74 x 32 x 25(mm)
